Protection Frame

Cough- and droplet protection for ENT workspace

At costprice
Our contribution during
the COVID-19 crises

- Protection against droplet ejection
- Unobstructed work with both hands
- Microscopy without restrictions
- Endoscopy possible
- Simply removable at the flexible Parallelogram swivel arm
- Easy self assembly - no customer service needed

Protection Frame „Unit“

Adapted to attach to existing plateau by clamping bar (see otopront unit below), article no. 250030

Easy turning of the clamp bar, no restriction of movement while microscope viewing

Protection Frame „Stand Alone“

Stand alone version on rollable tripod, easy to fold down, article no. 250031

Rollable, compact, slip and tilt-proof thanks to solid base, frame may be positioned on the left or right side of the chair
